IDENTIFIERS	*Florida

ABSTRACT

This ninth annual study of the status of desegregation in the Dade County Public Schools shows the racial and ethnic composition of student and employee groups throughout the school system and has tables with selected data from prior years for ease in noting changes which might have occurred. This report contains data to assist school officials in their continuing assessment of the effectiveness of the desegregation plan. The report includes the elementary and secondary schools, adult education, and all supporting administrative and service departments. It includes tables containing both basic data and various comparisons of pupils and certain employee groups. Although the reports on desegregation in the Dade County Public Schools have included pupils and employees in all programs and departments of the school system, emphasis has been on pupils in the regular day schools since the primary purpose of the studies has been to determine the extent of racial "mix" between black and nonblack pupils in the K-12 program. Tables 1-7 are a tabulation of the basic data obtained in a survey of the entire school system. Analysis of this data resulted in several comparisons and special listings which are included in tables 8-11.

DESEGREGATION IN DADE COUNTY PUBLIC SCHOOLS
SEPTEMBER 1973

Introduction

This ninth annual study of the status of desegregation in the Dade County Public Schools shows the racial and ethnic composition of student and employee groups throughout the school system and has tables with selected data from prior years for ease in noting changes which have occurred.

This report, prepared by the Department of Administrative Research, contains data to assist school officials in their continuing assessment of the effectiveness of the desegregation plan and in making adjustments, if necessary, to achieve or maintain the balance desired. The report includes the elementary and secondary schools, adult education and all supporting administrative and service departments. It includes tables containing both basic data and various comparisons of pupils and certain employee groups.

The classification of pupils into the several minority groups used in this report are as required by the United States Department of Health, Education, and Welfare in their reports. Employees are classified similarly except for the omission of American Indian and Asian.

History of Desegregation in Dade County

In September 1959, Dade County became the first in Florida to desegregate its schools. (The word "desegregated" as used in this narrative refers to any mix of black and non-black pupils regardless of numbers.) Two schools, Orchard Villa and Air Base Elementary, opened with a total enrollment of 777 including 25 black pupils. From this token beginning, the Dade County Public Schools have experienced considerable change. This year there are 157 elementary, 37 junior high, and 19 senior high

school centers having both white and black pupils; the total membership in these 213 schools on October 1, 1973 was 227,114 including 55,605 black pupils. This includes 92.2% of the 231 elementary, junior high and senior high schools, 85.6% of the black pupils and 95.6% of the white (all non-black) pupils in the regular program.

Rapid changes in community housing patterns quickly converted Orchard Villa to an all-black school but by September 1961, without Orchard Villa, there were eight desegregated schools. At the end of the 1962-63 school year, desegregation began to accelerate and in the fall of 1963 some 42 schools had both white and black pupils. In the first survey on desegregation made by the Administrative Research Department in October 1965, it was found that 92 of the 208 public schools had been desegregated. In these 92 schools were 15,306 or 33% of the black pupils and 82,727 or 53% of the white pupils. By 1967 the number of desegregated schools had increased to 123 of 213 schools including, 30,466 or 56.8% of the black pupils.

In the summer of 1969, after a survey of the school system by a team from the Department of Health, Education and Welfare, orders to speed up the desegregation process were received. A plan to carry out these orders, including some immediate action, was challenged in court by a group of citizens. When the local court ruled against the School Board the case was appealed to the U. S. District Court which ordered that the plan be put into effect; the Federal court also issued speed-up orders which were more stringent than those from the Department of Health, Education and Welfare including complete desegregation of the full-time instructional staff in all schools by mid-year. Consequently, in February 1970 about 2,000 teachers were reassigned to effect a balance in each school to match the black-white teacher ratio in each school's respective grade level. A plan for "total" desegregation of pupils was put into effect in September 1970. When the U. S. District

Court failed to approve the plan in full, appeal was made to the Fifth Circuit Court in New Orleans. In the summer of 1971 the Circuit Court ruled that the Dade County Public Schools constitute a unitary school system and that the plan, therefore, was acceptable.

The court's declaration that sufficient desegregation had been achieved to earn the classification "unitary school system" relieved the School Board of the responsibility for additional desegregation. However, in July 1971 the Board agreed that further desegregation is desirable and that the school system should voluntarily strive for a better racial balance of pupils throughout the district. To accomplish this the Board established an office of Desegregation Planning and Implementation and appointed a competent staff. During the 1971-72 school year this group developed a new countywide desegregation plan which would have eliminated the few remaining all-black schools and all-white schools and would have required additional bussing of pupils. The Board, however, rejected the plan and agreed to accept certain adjustments to maintain compliance with the court order while yet another plan would be developed under different guidelines.

In the summer of 1972 the Office of Desegregation Planning and Implementation became the Office of Equal Educational Opportunity.

Status of Desegregation, September 1973

Although the reports on desegregation in the Dade County Public Schools have included pupils and employees in all programs and departments of the school system, emphasis has been on pupils in the regular day schools since the primary purpose of the studies has been to determine the extent of racial "mix" between black and non-black pupils in the K-12 program. Consequently, all non-black pupils as well as employed personnel have been treated as one classification except where minority groups of pupils (American Indian, Asian, and Spanish surnamed) were shown separately as

reported to the United States Department of Health, Education, and Welfare. At the request of the Office of Equal Educational Opportunity, this report shows the number of Spanish surnamed personnel in all classifications also.

Throughout this report combination schools are classified by predominate grade level. Only full-time instructional personnel were included in the report. Some teachers work in more than one school although they are full-time personnel; these itinerant teachers were reported with area office instructional personnel in Table 6. Employee data for non-instructional personnel, however, include part-time as well as full-time employees.

Tables 1-7 are a tabulation of the basic data obtained in a survey of the entire school system and include data for both pupils and employees. Tables 2, 3, 4 and 5, cover the elementary schools, junior high schools, senior high schools and special centers, respectively. Table 1 contains a summary of pupils and both instructional and non-instructional personnel in the schools. This table reveals that total membership as of October 1, 1973 was 244,351[a]. Of this number 64,939 (26.6%) were black and 66,439 (27.2%) were Spanish surnamed pupils; an additional 187 American Indian and 698 Asian pupils made 132,263 pupils in these four minority groups or 54.1% of the total membership. Table 6 covers central administration, area offices, and countywide services, while Table 7 covers the adult education program.

In Tables 2-5, in addition to a breakdown of the numbers of pupils and teachers into selected minority groups, percents are shown. For other employed personnel, (and in Tables 6 and 7) only the count of black, Spanish surnamed and other employees at each location was tabulated.

Analysis of the basic data recorded in Tables 1-5 resulted not only in the percents

[a]221 exceptional children in public and private schools and agencies not included.

shown but also in several comparisons and special listings which are included in Tables 8-11.

Table 8 reveals the exact extent of desegregation in each school. In this table the schools are listed by area as in Tables 1-5 showing total membership and percent which are black with matching data from 1969, the last year before the U.S. District Court ordered the pairing and grouping of schools to achieve full desegregation of the school system, and 1970, the first year under the court-ordered desegregation plan.

In Table 9 the percent and number of black pupils in each school is shown with schools listed in rank order from 100% to 0% within each grade group. This table reveals that only seven elementary schools, one junior high school and one senior high school are 100% black while only eight elementary schools, and one junior high school have no black pupils. However, a large number of elementary schools (55) which have both black and white pupils are less than 5% black.

The racial and ethnic composition of the pupil population by areas for the nine years of these desegregation reports beginning in 1965 is shown in Table 10 while Table 11 shows the countywide increase or decrease in each group from year to year.
